IET Vision and Imaging Network

![IET Communities — The Institution of Engineering and Technology]

7th IET International Conference on Imaging for Crime Detection and Prevention (ICDP 2016)

ICDP 2016 aims to create an important networking forum in which participants can discuss the present and future of image-based technologies for crime detection and prevention.

Keynotes include:

Juan García Sánchez, Chief Officer, Communications and Video Surveillance Unit, Madrid Municipal Police
Policing the city: The Madrid experience

Dr Josh Davis, Reader, University of Greenwich, UK
Searching for super-recognisers in the police and the general public

Per Stahl, Axis Communications
Image quality for forensic usage in city surveillance

Special Session for EU Projects
We have a special session organised by the LASIE Project with presentations of EU-funded projects in the areas of security and crime prevention.

Conference Papers:
Presentation of peer-reviewed papers in relevant areas such as Forensics, Biometrics, Behaviour Analysis, Robust Methods and X-Rays.
